

CARLOS MARLETA

Full Stack Developer

ABOUT ME

As a Full-Stack developer I seek to integrate an important professional team at the service of a company that faces new challenges to consolidate a progressive future where, from my place, I provide commitment, productive, responsible work and learn to grow professionally.

I have Developed E-commerce Team projects where I worked collaborating especially in the Backend with agile methodologies SCRUM and technologies such as Javascript, Node, Express, Postgres, Sequelize as well as other libraries and also in individual SPA projects as a Full Stack.

I consider myself a responsible, organized and proactive person, with very good management of interpersonal relationships, predisposition for teamwork and challenges. I am interested in developing myself in dynamic environments that allow me to continue learning and continue developing as a programmer.

There is still a lot ahead. Effort, collaboration and constant search for new solutions to improve people's lives through responsible practice and custom design for that purpose.
