

CARLOS MARLETA

Full Stack Developer

ABOUT ME

I am a proactive person, very curious and energetic. I like to always be on the move thinking positive.

I bet on teamwork to meet the objectives that we set for ourselves and obtain the best results.

I would love to work in a company where each project is personalized in detail for its clients with innovative, original products with a great progressive impact.

Always wanting to continue learning to be a better programmer every day.

TECH EDUCATION

HENRY 2021

+800 hs. Web Development Bootcamp at SoyHenry.

PROJECTS

*Foodrecipes

Role: full stack developer.

I developed a full-stack web project about food recipes where you can search, filter, order & create new pokemons. I built its own database flow and request info from an API.

Techs: JavaScript, React/Redux, CSS, NodeJs, Express, Sequelize, PostgreSQL.

*TuKitek

Role: backend developer.

E-commerce where you can search, filter and buy tickets for different events. There are three possible users: guest, user & admin.

Javascript, React/Redux, Node.js, PostgreSQL, Express, Passport, Sequelize, Google Login, Nodemailer, Payment Methods.

*Pokemons Api

Role: backend developer.

Complete CRUD with NodeJs Express and Dynamo DB.
