CARLOS MARLETA
Full Stack Developer

ABOUT ME

I´m Full Stack Developer graduated from Henry Bootcamp oriented on Backend
and also teacher of artistic education.
With 46 years old I decided to convert and dedicate myself to programming.
During the lockdown due to the pandemic I had the opportunity to do it , for me and for a better future for my family, Naty and our 2 years daughter call Bruna

In this wonderful new and long road, I seek to collaborate and be part of a company in which I feel fully identified with it vision, it culture and its technological projects.
I feel confident with certain reasons why I consider myself a good candidate to give me an opportunity to join your team. Because I am passionate about what I do.Because I am looking for long-term job stability.
Because my goal is to learn from a great team by participating and collaborating in innovative, original, creative and personalized projects, adding value and motivation from my role.
But above all these things, because I am a good person, a good partner, cheerful and always looking and trying to be better personally and as a programmer, of course.

TECH SKILLS

• Javascript • ReactJS
• Redux • Node.js • Express Web Server• PostgreSQL • Sequelize
• HTML • CSS • Webpack Git
