- **I** MySQL

Versions Control

- **I** Git
- **A** GitHub

Frameworks & Platforms

- **A** Node.JS
- **A** Express
- **A** Sequelize
- **A** React
- **A** Redux
- **I** Bootstrap

Infraestructure

Operating Systems

- **A** Windows

Language Proficiency

🌐 **Español** (native)   🌐 **Ingles** (advanced)

Projects

TuTicket

https://github.com/kinko7/ITicket

E-commerce tickets sales for events. I collaborate on the Backend. We implement the REST architecture. Development with agile methodologies SCRUM. Was Develop Using Node.js, Exprees, Sequelize and Postgres with libraries and frameworks like Passport, google-auth-library, nodemailer and payment services such as Mercado Pago and PayPal. On Frontend we use Javascript, React, Redux, figma and other frameworks.

Food Recipes App

https://github.com/kinko7/AppFood-PI

SPA buid with Javascript - React - Redux - Node.js - Express - Postgres - Sequelize / Project based on an external API that contains information about cooking recipes. It was designed as a SPA that uses the data from the API to then filter the information as required and store it in a database. Features * Pagination of 9 recipes per page and filtered by Alphabetical order. * Filtered according to higher or lower healthy diet score. * By selecting a recipe you get step-by-step details and ingredients. * Search bar by name or ingredient. * Form that allows the creation of a new recipe by applying the required parameters and importing an image of your choice through a URL.

Pokemon Rest Full APIs

https://github.com/kinko7/PokemonApi

Complete CRUD with NodeJs Express , Postgres and Sequelize ORM. Get all-Get by ID, by name, by type. Update, Create and Delete.

BackEnd E-commerce Bokks

https://github.com/kinko7/Backend-EngineerAidsForAids

BackEnd Api Rest developed with Node, Express, Sequelize and PostgresDB

Luxury Real Estate

https://github.com/kinko7/kinko7.github.io

Single Marketing page . Html - Javascript and Bootstrap

Personal Portfolio

https://github.com/kinko7/my-portfolio

Build with React and NodeJs.
